7. Operations and Modification of This Specification

Modification must be carried out under mutual agreement.

Any Accidents caused by non-described items in this specification must be discussed and solved mutually.

8. Important Notes (Warranty)

1) The batteries are warranted to conform to the description contained in this Specification for a period of twelve [12] months from the ex-factory date and any claim by you (customer) must be made within such period.

During that warranty period, if the Batteries are proved to become defective, non-defective and conforming Batteries will be supplied in due course at sole expense of Matsushita Battery Industrial Co., Ltd. (MBI or PBA-LD) upon MBI(PBA-LD)'s own determination that this is apparently caused by negligence of MBI(PBA-LD).

Any further claims based on the delivery of defective Batteries shall be excluded. Such exclusion shall not affect the liability of MBI(PBA-LD) based on product liability for grossly negligence or intentional behavior of MBI(PBA-LD).

2) Confirmation of the matching and reliability of Batteries into your actual sets or units is your own responsibility.

3) MBI(PBA-LD) shall not warrant or be responsible in any case where your fails to carry out proper handling, operating, installation, testing, service and checkout of the batteries and/or to follow the instructions, cautions, warnings, notes provided in this Specifications, or other MBI(PBA-LD)'s reasonable instructions or advice.

9. Others

- 1) CR123A is developed for Camera use only, and requested to replace within two years if its used for another usage, out of Camera use.
- 2) This product specification will be validated assuming that it is accepted when it is not returned within six months from the date of issue.
- 3) The weight of lithium metal content in this battery is within the limit of dangerous goods in regulations of transportation such as IATA, IMO, or DOT. This battery is certificated UN Recommendation on the Transport of Dangerous Goods.
- 4) This battery does not contain any toxic materials, such as mercury, cadmium or lead.

10. Precautions for use

1) The battery shall not be stored at temperatures in excess of 45°C.

Storage at less than 35°C is recommended. Storage at less than -20°C can deform the plastic parts and may cause a leakage. To prevent self-discharge caused by corrosion or decrease of insulation, humidity during storage shall be less than 70%RH.

- 2) The battery has an explosion resistant construction. But the following cautions should be taken, because combustible materials such as lithium metal and organic electrolyte are contained in the battery.
 - * Do not use except in applicable model or equipment.
 - * Do not connect more than two cells in series.
 - * Do not mix new (fresh) and old (end of life) batteries.
 - * Do not force-discharge.
 - * Do not mix different types (chemistries) of batteries.
 - * Do not short circuit.
 - * Do not dispose in fire.
 - * Do not charge.
 - * Do not disassemble.
 - * Do not heat up more than 100°C.
 - * Do not solder directly onto batteries.
 - * Do not soak in water.
 - * Do not deform.
 - * Do not inadequacy modify and remodel for installation.
 - * Insert the batteries in correct polarity position.
- 3) Keep away from heat source or flame.
- 4) The battery shall not be washed by ultrasonic wave washer.
- 5) Keep away from children and infants to prevent the possibility of swallowing by mistake.
